# THE WAY TO EFFICIENTLY MANAGE YOUR ASSET

Where is the concrete mixer currently being used? How long will the diamond coring tool be needed at the building site? When does it have to be serviced?

Hilti ON!Track is a cutting-edge solution that offers a way out of the expensive and tedious “tool-management dilemma”. Thanks to our cloud-based software, every piece of available equipment may be recorded, registered, and efficiently managed.

Furthermore, rather than questions, ON!Track supplies you and your employees with answers – and reliable information. You know just what equipment is available at your building site, where it is, what condition it is in, and which employee is currently responsible for it. You also obtain useful data about how to optimize your equipment in the future.

Last but not least, Hilti ON!Track assists you when it comes to work safety: With the software, all the required and existing certificates, as well as maintenance and training dates, are easy to access. Get to know the facts on why Hilti ON!Track can help you increase your company's productivity.

## FACTS & FIGURES

### 90 HOURS **spent searching**

An average of 90 hours per month is spent on building sites searching for equipment.

### 65 % **difficulties with tracking**

65 percent of all customers have a hard time keeping track of required certificates and maintenance dates.

### 6 TOOLS **go missing**

About six pieces of equipment on average go missing per month.

# WE MANAGE YOUR TOOLS

So you can manage your business.

Hilti Fleet Management is an all-inclusive service (Repair, freight, tracking, theft coverage, etc.) where your tool costs are covered by a fixed monthly fee. Check out the video to know what Fleet Management is !

## HOW HILTI FLEET MANAGEMENT HELPS YOUR BUSINESS?

### EASY BUDGETING

A fixed monthly fee covers all tool, service and repair costs. This means no large investment up front and predictable costs in the future

### NO ADDITIONAL COSTS

Fleet Management includes fast, high quality repairs of the tools you use, free of charge and during the entire period of the contract. Freight cost, battery change covered.

### LOAN SERVICE

Complementary loan tools minimize downtime in the case of repairs or theft and keep your teams working.

### THEFT COVERAGE

Fleet management limits your financial exposure in the event of a theft. Fast and easy tool replacement means less downtime.

### LABELLING AND TRACKING

All tools can be labelled with your company logo. A reliable online tool fleet list and tracking system provides transparency and easy invoice consolidation.

### TOOL EXCHANGE

Fleet management keeps you equipped with up-to-date tools for high productivity and compliance with the latest health and safety standards.

### PEAK DEMAND COVERAGE

Peak work periods can easily be covered with short-term access to additional Hilti tools.

# TOOL SERVICE

Outstanding after-sales services for a tool's lifetime.

HILTI TOOLS ARE BUILT TO LAST. BUT EVEN IF A DEFECT OCCURS, HILTI WILL TAKE CARE OF IT QUICKLY AND PROFESSIONALLY.

No-cost wear & tear covered warranty - better cost control and hassle free!

**Free**  
Spare Parts

**Free**  
Labor Cost

**Free**  
2-way Freight

Quality repair with 3-month after-repair warranty - never repair at dealers!

**Safety Test**

**Performance Test**

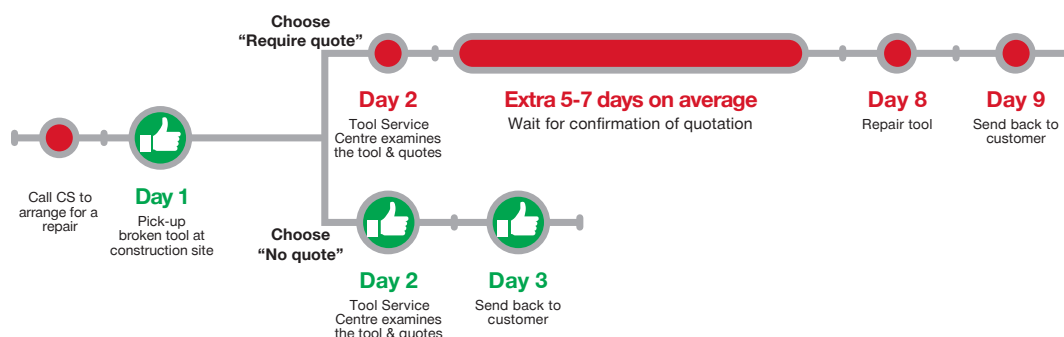

**Tool Cleaning**

**Re-application of Lubricant**

"3-day or free" repair turnaround time promise - no quotation, much faster!

Do you know? Most of the time of a repair is spent on waiting for confirmation of quotation!

#### Terms and conditions

- 3 day or free - Valid only for repairs in HK (Exclude Macau). Time Promise calculation excludes Saturday, Sunday, bank holidays and any special non-working days listed on Hilti Website. Measuring products and heavy diamond tool (DD350 or above, wire saw & wall saw) are excluded from Time Promise. Special reasons due to customer to delay the time promise such as request to change the delivery date and unreachability of customer, etc
- Please visit <https://hilti.to/czdhnz> for the details of special warranty items.
- Non-reparable items can be found in link <https://hilti.to/czdhnz> for details. Hilti will provide replacement of those tools.

# CALIBRATION SERVICE

Verified accuracy. The check-up for  
Hilti measuring tools.

In spite of their ruggedness, Hilti measuring tools, like all precision instruments, may be negatively affected over time by everyday use under harsh jobsite conditions or by varying storage conditions and other external influences. Thanks to the Hilti Calibration Service, however, professionals in the construction business can always rely on their Hilti measuring tools.

Regular checks ensure that the tools continue to operate reliably in accordance with the applicable standards and statutory requirements. Hilti thus recommends annual calibration of every tool subject to normal use. If deficiencies are found, the tool will be readjusted to ensure that it functions as precisely and reliably as ever. Hilti guarantees this – in the form of a calibration certificate confirming that the tool meets specifications, and with a sticker showing the date of the most recent calibration.

## PRECISION COMES AUTOMATICALLY

Thanks to an automatic reminder when the next calibration service is due, users can be sure that their Hilti measuring tools are checked professionally at regular intervals and that they comply with the specifications given in the operating instructions.

# DX TOOL TRAINING

Hilti cares about your safety!  
Certificate of competency for  
cartridge-operated fixing tool.

Cartridge Operated Fixing Tool (DX) is commonly used in the construction and maintenance works. Applications such as partition walls installation, fastening ceiling brackets, lighting and temporary wood fastening used DX tool to enhance productivity. Hilti DX Training Guide and Examination is developed in conjunction with the Labor Department in order to strengthen the proper usage and safety awareness within the construction professionals.

## SYLLABUS

To train tool operators to understand

- Introduction of safety legislation and DX tool safety guidelines
- The know-how of tools techniques, operating, and maintenance
- Illustration of DX tool fastening operation
- Examination

## CARTRIDGE-OPERATED FIXING TOOL (DX TOOL) CERTIFICATE OF COMPETENCY

- Tool operators must complete this training course and pass the examination before the Certificate of Competency is issued
- Certificate of Competency must have a recent photograph of the operator printed
- Certificate of Competency is required to be carried at all time for safety officers or inspectors from the Labour Department to inspect
- Certificate of Competency is a legal document, where transferring or loaning to others is an offense

# ANCHOR PULL-OUT TEST

Site safety is our first priority.  
Dedicated to ensuring proper  
anchor installation.

To ensure safe anchor installation, reliable building material and quality control on workmanship are of the same level of importance. Beside proper installation training to workers, on-site anchor test is a common way to verify their workmanship. To offer one-stop-shop service to customer, Hilti can refer anchor test service to customer, offered by an independent laboratory as described below.

## HILTI (HONG KONG) LTD. - TESTING LABORATORY

This laboratory is accredited by HOKLAS (registration No. 157) for a specified range of anchor tests listed in the HOKLAS Directory of Accredited Laboratories.

## ON-SITE ANCHOR TEST SERVICE

A certain percent of on-site pull-out test on installed anchor is required to verify the workmanship of installation. And different anchor types and sizes require different equipments for testing. For light- or medium-duty anchors, pull-out test can be carried out by simplest and handy tools, like DPG 100, Tester 4 or HAT 28. And for heavy-duty anchors or rebars, the test will be carried out by hydraulic jack. If recovery of the anchor deformation is concern, deformation test is also available for choice.

Our experienced team of technician can provide not only anchor testing service but also professional advice on site investigation before testing, which can ensure a smooth process of testing and improve the efficiency of the construction as a whole.
