## Standard nail X-C

### APPLICATIONS

- Drywall track to concrete
- Window frame metal sheet to concrete

### ADVANTAGES

- Buckle-proof, high-strength hardened steel nail for demanding applications
- Rugged head resists pull-over forces and holds material down securely

## Powder-actuated tool DX 5 **NEW**

### APPLICATIONS

- Fastening wood to concrete, sand-lime block or steel
- Fastening sheet metal to concrete, sand-lime block or steel
- Attaching drainage foils and membranes to concrete or CMU block
- Installing wall or brick ties
- Fastening various items such as cable conduits and cable ties to steel and concrete in electrical installation work

### ADVANTAGES

- Easy to use and maintain
- Compact, sleek design allows access in narrow spaces
- Ergonomically designed grip and tool nose
- Maximum nail length 62 mm, or 72 mm for wood-to-concrete applications

### Technical data

## Powder-actuated tool DX 351

### APPLICATIONS

- Quick and convenient for fastening applications such as drywall track attachment, electrical, plumbing and HVAC installation work
- Installing threaded studs to concrete or steel
- Fastening suspended ceilings

### ADVANTAGES

- Automatic piston return and cartridge advance
- Very user-friendly: light, low recoil, low noise
- Pole tool available for overhead applications

# X-C Nail for fastening to concrete and sand lime masonry

## Product data

### Dimensions

#### X-C \_\_ P8

#### X-C \_\_ MX

#### X-C \_\_ P8S23

#### X-C \_\_ P8S36

### Material specifications

Carbon steel shank: HRC 56.5  
HRC 58 \*)

Zinc coating: 5–20 µm

\*) X-C 82, 97 and 117 P8 ( $d_{nom} = 3.7$  mm)

### Recommended fastening tools

- See fastener program in the next pages.

#### X-C \_\_ P8S23T (for tunneling applications)

## Applications

### Examples

Conventional formwork

System formwork

Drywall track to concrete

## Performance data

### Recommended resistance under tension and shear load

Loads depending on embedment depth  $h_{ET}$ :

$$N_{rec} = V_{rec} = 1.3 \text{ kN for } h_{ET} \geq 25 \text{ mm}$$

### Conditions:

- For safety relevant fastenings sufficient redundancy of the entire system is required: minimum 5 fastenings per fastened unit.
- All visible failures must be replaced.
- Valid for concrete with strength of  $f_{cc} < 30 \text{ N/mm}^2$ .
- Valid for predominantly static loading.
- Failure of the fastened material is not considered in recommended loads.
- To limit penetration of nail in soft material and to increase pullover load, use nails with washers.
- Factor of safety = 4
- Tested as per ASTM E1190 in Hong Kong HOKLAS recognized testing laboratory.

## Application recommendation

### Base material and fastened material thickness

Concrete  
 $h_{min} = 80 \text{ mm}$   
 $t_f \leq 50.0 \text{ mm}$

### Fastener positioning in base material

Edge distance:  $c \geq 70 \text{ mm}$   
 Spacing:  $s \geq 100 \text{ mm}$

### Fastener shank length recommendation

For standard fastening:  $L_S = h_{ET} + t_l$  [mm]

For flush fastening:  $L_S = h_{ET} + t_l - 5$  [mm]

Concrete:  $h_{ET} = 22$  mm

Sandlime masonry:  $h_{ET} = 27$  mm

Fastening  
wood to concrete  
 $t_l = 15 - 40$  mm

Fastening  
insulation to concrete  
 $t_l = 15 - 40$  mm

Fastening  
steel to concrete  
 $t_l = 0.6 - 2$  mm

### Corrosion information

- The intended use for safety relevant and permanent applications only comprises fastenings which are not directly exposed to external weather conditions or moist atmospheres.
- For more details, please refer to following technical document: Hilti Corrosion Handbook.

## System recommendation

- For more details, please refer to the chapter **Accessories and consumables compatibility** in the Direct Fastening Technology Manual (DFTM).

### 第59R章

#### 工廠及工業經營(槍彈推動打釘工具)規例 - 摘要

##### 釋義

"槍彈"(cartridge)指設計供工具用的能產生推進氣體的槍彈；

"間接推動工具"(indirect-acting tool)

指推動力通過有限軸向運行的居間活塞始傳達至釘上的工具；

"認可工具"(approved tool)

指處長根據第19條認可的任何工具，包括該工具的任何部分；(1988年第329號法律公告)

只可使用認可工具

承建商、東主及操作員的責任

除認可工具外，不得在工業經營中使用其他工具

##### 槍彈

任何槍彈，除符合製造商就個別類型及個別式樣的工具而定的規格者外，均不得在該工具的操作中使用。

##### 釘

(1)任何的釘，除符合製造商就個別類型及個別式樣的工具而定的規格者外，均不得在該工具的操作中使用。

(2)任何的釘，包括其帽及環，其尺寸須與工具的身管口徑配合。

##### 操作員須持有合資格證明書

(1)除持有合資格證明書的人外，其他人不得使用工具。

(2)合資格證明書的格式須經處長批准。

##### 罪行及罰則

(1) 在任何建築地盤或任何其他工業經營內，如有違反第4、5、6、7、8、9、10、11、12、13、14或16條的任何條文之事，或就該建築地盤或工業經營有違反上述各條的任何條文之事，則在該建築地盤從事建築工程的承建商，或該工業經營的東主，即屬犯罪，可處罰款\$50000。

(2)任何操作員違反第6、7、9(2)或(3)、11、13、14(2)或15條的任何條文，即屬犯罪，可處罰款\$10000。

(3)任何人違反第17條的任何條文，即屬犯罪，可處罰款\$50000。

### Chapter 59 FACTORIES AND INDUSTRIAL UNDERTAKINGS ORDINANCE - ABSTRACT

#### Interpretation

Attention: Mr. Denny Wu

Dear Sir,

Procedures for building materials submission

I refer to your letter dated 19 May, 1997 concerning the above.

2. Please be advised that there is no provision under the Buildings Ordinance for the Building Authority to approve any proprietary building products. Under the Buildings Ordinance, authorized persons and/or registered structural engineers are required to supervise building works including the selection and installation of proprietary building products and to certify compliance with the Buildings Ordinance upon completion of works. They are therefore responsible for ensuring the health and structural safety requirements, inter alia, of these building products in the building projects which they have been appointed by the developer to co-ordinate and supervise. It is also their responsibility to ensure these products have been installed in accordance with the manufacturers' specifications and complied with the Buildings Ordinance and Regulations.
3. In establishing the acceptability of the proprietary products in building works, reference may be made to the performance standards laid down in Building (Construction) Regulations 1990 and the current Practice Note for Authorized Persons and Registered Structural Engineers 140 in which performance requirements for compliance are given. Reliance may also be placed on the test/assessment report prepared by a recognized laboratory or an equivalent establishment.
4. Before the proprietary products are installed in a building project, the authorized person and/or registered structural engineer appointed for the project should be approached by the manufacturers or their agents for advice and guidance. **Prior approval/acceptance from the Buildings Department is not required.**
5. Generally, all relevant information supporting the use of the proprietary products in building works under the Buildings Ordinance should be submitted associated with the prescribed plans for approval on project basis.

/ Notwithstanding....

6. Notwithstanding the above, the proprietary building products to which 'No objection' letters have been given are still recognized as accepted constructional materials to be used in building works under the Buildings Ordinance provided that all conditions specified in the letters are satisfied. You are informed that the procedures currently adopted by the Building Authority for processing statutory approval of plans which involve the use of these proprietary building products remain unchanged.

7. It is a fact that the 'No objection' letter giving general acceptance to a proprietary building product is based on the technical information submitted to this Department at the time of its application. Should there be any significant modification to these technical information, the product will certainly be considered as 'new' product. The acceptability of such proprietary product in building works should be evaluated by the authorized person and/or registered structural engineer appointed for the project as mentioned above.

8. Should you have any further queries to the above, please feel free to contact the undersigned or Mr. T.C. Kan of this office at phone no. 2626 1583.

Yours faithfully,

(K.S. Chang)

Technical Secretary/Structural  
for Building Authority.
